

The Effects on Medicinal Plants

If the Proposed Site C Dam were to be constructed

- BC Hydro has not completed a First Nations focused medicinal plant assessment of the Peace River Valley
- BC Hydro admits Site C would impact vegetation within the project area but what about culturally important plants?
- Instead, BC Hydro is using information taken from Traditional Land Use Studies – these studies provided general information only
- BC Hydro is not taking the issue of medicinal plants seriously or the importance of these plants to our members and the continued practice of their Treaty Rights
